

**Godmanchester
Bridge Academy**

E-Safety Policy – Feb 2023

Together We: Inspire Enjoy Achieve

 Part of the ACES Academies Trust

Background to this policy

The purpose of this policy is to describe the safeguarding measures in place for adults and children in school in relation to e-safety, including:

- The policies and practice embedded in our school and followed by the whole school community
- The infrastructure and how it is set up to keep pupils safe online, including monitoring, and preventing and responding to e-safety incidents
- A progressive, age appropriate e-safety curriculum for all pupils

E-safety in schools is primarily a safeguarding and not a computing / technology one. Therefore this policy should be viewed alongside other Safeguarding policies and approaches including, but not limited to:

- [Professional boundaries in relation to your personal internet use and social networking online – advice to staff \(LSCB\)](#)
- Safeguarding and Child Protection
- Personal Social and Health Education (PSHE)
- Safer Working Practices
- Data Protection Policy
- Anti-Bullying Policy
- School Complaints Procedure
- [Cambridgeshire Progression in Computing Capability Materials](#)
- Whistle Blowing Policy

This policy must be read alongside the staff and pupil Acceptable Use Policies attached as appendices.

All staff must be familiar with this policy and all staff and pupils must sign the relevant Acceptable Use Policy before being allowed to access school's systems (see appendices). As e-safety is an important part of strategic leadership within the school, all staff have a shared responsibility to ensure that the policy and practices are embedded. This will be monitored by the Headteacher, the Designated Person for Child Protection and governors.

Rationale

At Godmanchester Bridge Academy, we believe that the use of technology in school brings great benefits. To live, learn and work successfully in an increasingly complex and information-rich society, our children must be able to use technology effectively.

The use of these exciting and innovative technology tools in school and at home has been shown to support learning and promote pupil achievement. Yet at the same time, we recognise that the use of these new technologies can put young people at risk within and outside the school.

The 4 key categories of risk

Our approach to online safety is based on addressing the following categories of risk:

- 1. Content** – being exposed to illegal, inappropriate or harmful content, such as pornography, fake news, racism, misogyny, self-harm, suicide, antisemitism, radicalisation and extremism

2. **Contact** – being subjected to harmful online interaction with other users, such as peer-to-peer pressure, commercial advertising and adults posing as children or young adults with the intention to groom or exploit them for sexual, criminal, financial or other purposes
3. **Conduct** – personal online behaviour that increases the likelihood of, or causes, harm, such as making, sending and receiving explicit images (e.g. consensual and non-consensual sharing of nudes and semi-nudes and/or pornography), sharing other explicit images and online bullying; and
4. **Commerce** – risks such as online gambling, inappropriate advertising, phishing and/or financial scams

While children and young people need support to keep them safe online, the risks associated with the use of technology are not restricted to just them. E-safety issues can also affect adults who work or are associated with the school and this will be referenced in more detail later in this policy.

Technology in school

Technologies regularly used by our school community include:

Staff:

- Staff laptops and desktop computers, including staff level internet access, server access and access to MIS systems
- Staff laptops can be used at home in accordance with the staff AUP
- Staff and curriculum iPads for preparing and delivering pupil activities
- Class cameras and other peripherals such as visualisers and Interactive Whiteboards.

Pupils:

- Curriculum iPads, laptops and desktop computers including filtered access to the Internet and pupil level access to areas of the school network
- Cameras and peripherals including programming resources

The E-Safety Curriculum

When using online technologies, it is essential that children understand how to behave in a safe and responsible manner and also how to react when faced with inappropriate content or situations which make them feel uncomfortable. The need for a progressive, age appropriate e-safety curriculum is clearly documented in the National Curriculum for Computing which states that:

- **At KS1:** use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.
- **At KS2:** use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.

By the **end of primary school**, pupils will know:

- That people sometimes behave differently online, including by pretending to be someone they are not

- That the same principles apply to online relationships as to face-to-face relationships, including the importance of respect for others online including when we are anonymous
- The rules and principles for keeping safe online, how to recognise risks, harmful content and contact, and how to report them
- How to critically consider their online friendships and sources of information including awareness of the risks associated with people they have never met
- How information and data is shared and used online
- What sorts of boundaries are appropriate in friendships with peers and others (including in a digital context)
- How to respond safely and appropriately to adults they may encounter (in all contexts, including online) whom they do not know

At Godmanchester Bridge Academy, we believe that a comprehensive programme of e-safety education is vital for developing our pupils' ability to use technologies safely. We believe that just as children learn how to swim by going to a swimming pool so they will learn safe life-long online behaviours by accessing and using a range of online services including the World Wide Web.

This is achieved using a combination of:

- Discrete lessons on E-Safety as part of GBA's computing curriculum evidenced in teachers' planning
- Additional lessons of E-Safety as part of Safer Internet Day
- Key e-safety messages are delivered and reinforced through cross-curricular opportunities such as emailing, researching, blogging and communicating in discussion forums.

Continued Professional Development

All new staff members will receive training, as part of their induction, on safe internet use and online safeguarding issues including cyber-bullying and the risks of online radicalisation.

All staff members will receive refresher training at least once each academic year as part of safeguarding training, as well as relevant updates as required (for example through emails, e-bulletins and staff meetings).

By way of this training, all staff will be made aware that:

- Technology is a significant component in many safeguarding and wellbeing issues, and that children are at risk of online abuse
- Children can abuse their peers online through:
 - Abusive, harassing, and misogynistic messages
 - Non-consensual sharing of indecent nude and semi-nude images and/or videos, especially around chat groups
 - Sharing of abusive images and pornography, to those who don't want to receive such content
- Physical abuse, sexual violence and initiation/hazing type violence can all contain an online element
-

Training will also help staff:

- Develop better awareness to assist in spotting the signs and symptoms of online abuse
- Develop the ability to ensure pupils can recognise dangers and risks in online activity and can weigh up the risks
- Develop the ability to influence pupils to make the healthiest long-term choices and keep them safe from harm in the short term

School website

The main purpose of our school website is to provide information. Our school website will not only tell the world that our school exists, but it will provide information to our pupils and parents, promote the school to prospective ones and publish the statutory information required by the Department for Education.

In conjunction with a range of online services, a school website can be used to showcase examples of pupils' work - in words, pictures, sound or movie clips - and can share resources for teaching and learning both within the school and with colleagues elsewhere.

Under safeguarding responsibilities, we will ensure that every parent/guardian has given permission for their child to appear on the school website.

Monitoring and averting e-safety incidents

The school keeps children safe when using online technologies through a combination of e-safety education, filtering and monitoring children's online activity and reporting incidents, including following child protection procedures where appropriate.

The school's technology infrastructure is designed to minimise the risks associated with adult and pupil use of technology. This is provided and maintained by ACES Central IT team. Safeguards built into the school's infrastructure include:

- Secure, private internet connection to each school with access to the National Education Network. Trust Managed firewalling.
- Base line and enhanced filtering provided by a Smoothwall provided approved filtering system
- Trust provided Sophos antivirus package
- Trust provided email system for all school staff and students
- Restrictions on download of software, apps and file types from known compromised sites

Staff also monitor pupils' use of technology and, specifically, the internet.

- Pupils' use of online services (including the World Wide Web) are supervised in school at all times.

A system of staff and pupil passwords is in place to enable appropriate access to the school network.

- All members of staff have individual, password protected logins to the school network.
- Visitors to the school can access part of the network using a generic visitor login and password.

- The school's network can either be accessed using a wired or wireless connection. However, the wireless network is encrypted to the standards advised by the Local Authority and the wireless key is kept securely by the school office.
- School staff and pupils are not permitted to connect personal devices to the school's wireless network and a guest wireless key is issued to visitors on a case by case basis.

Whilst we recognise that it is impossible to totally eliminate the risks associated with the use of technology, these safeguards are in place to help minimise these risks as much as possible.

Responding to e-safety incidents

It is important that all members of staff – teaching and non-teaching – are aware of how to respond if an e-safety incident occurs or they suspect a child is at risk through their use of technology.

The DSL logs behaviour and safeguarding issues related to online safety using My Concern.

Where a pupil misuses the school's ICT systems or internet, we will follow the procedures set out in our behaviour policy and acceptable use policy. The action taken will depend on the individual circumstances, nature and seriousness of the specific incident, and will be proportionate.

Where a staff member misuses the school's ICT systems or the internet, or misuses a personal device where the action constitutes misconduct, the matter will be dealt with in accordance with the staff code of conduct and acceptable use policy. The action taken will depend on the individual circumstances, nature and seriousness of the specific incident.

The school will consider whether incidents which involve illegal activity or content, or otherwise serious incidents, should be reported to the police.

In addition, the Education and Inspections Act 2006 empowers headteachers to such extent as is reasonable, to regulate the behaviour of pupils when they are off the school site and empowers members of staff to impose disciplinary penalties for inappropriate behaviour. This is pertinent to incidents of cyber-bullying, or other e-safety incidents which may take place outside of the school but has an impact within the school community.

With this in mind, the headteacher may decide to apply the sanctions and / or procedures in the relevant AUP to incidents which occur outside of schools if s/he deems it appropriate.

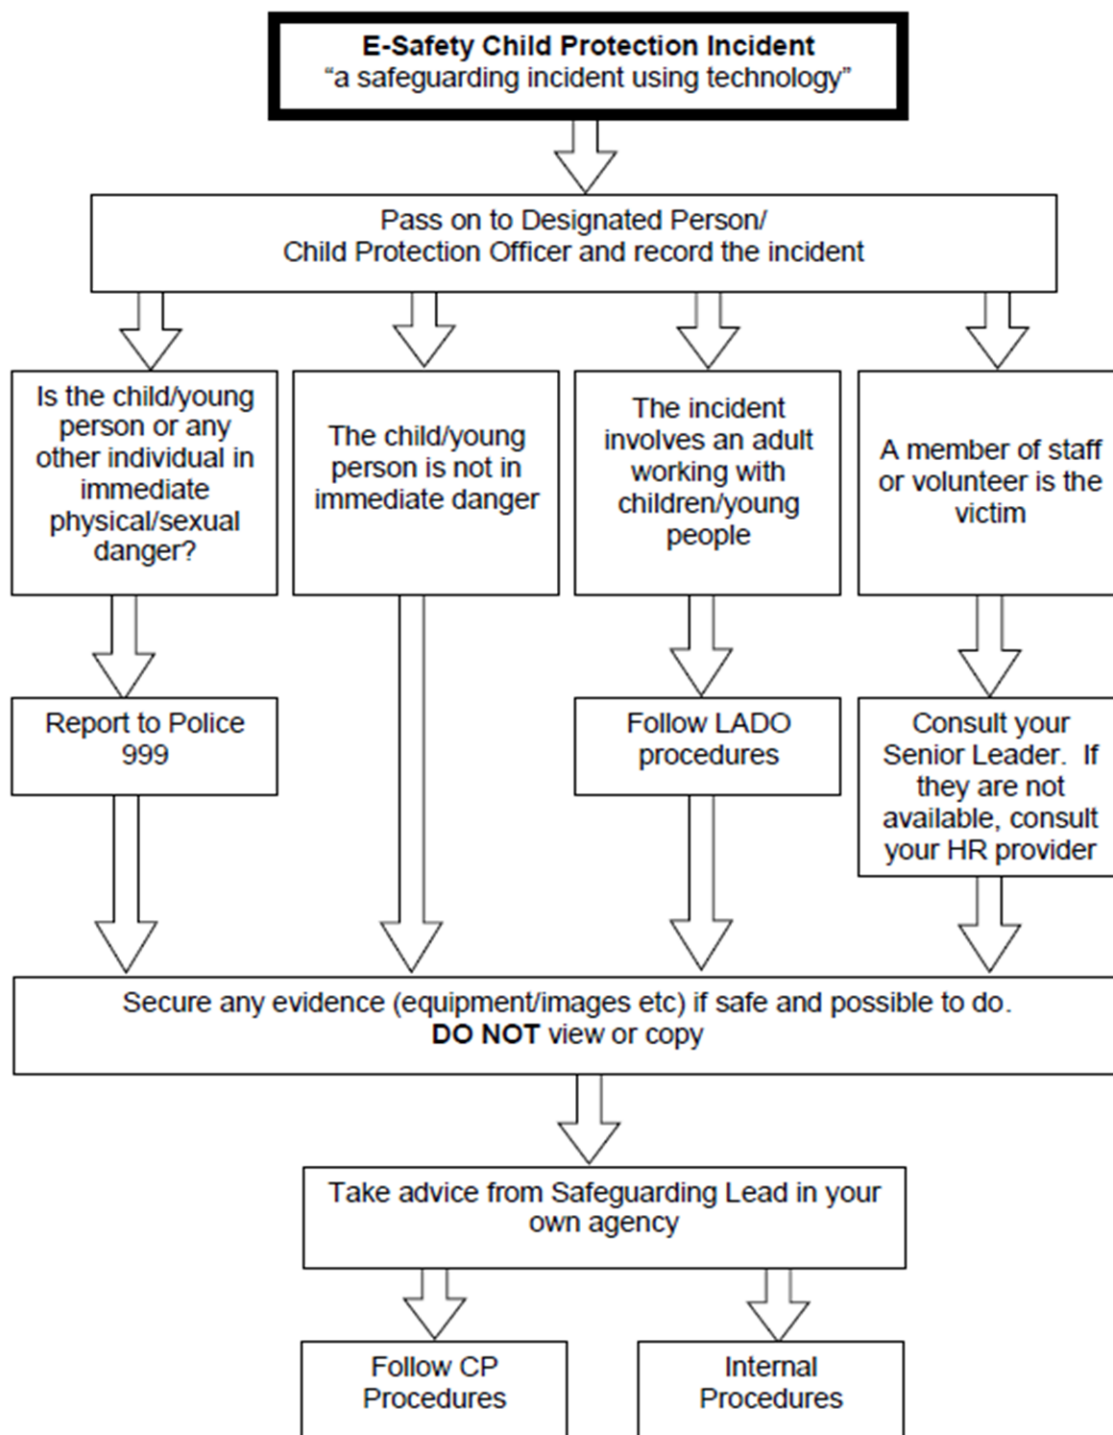

The Education Act 2011 gives school staff the powers, in some circumstances to search personal digital devices and decide whether or not to delete data or files if the person thinks there is good reason to do so.

However, there is a risk that this could conflict with guidance about dealing with incidents where a child may be at risk where it may be inadvisable to delete, save or share content. The school will always seek to resolve areas of concern with parents (where appropriate) before taking any further action.

NB: In our school, the likelihood of these types of instances occurring are already reduced as we don't allow pupils to use personal devices in school.

Where the school suspects that an incident may constitute a Child Protection issue, the usual Child Protection procedures will be followed. This process is illustrated in the diagram below.

You come across a child protection concern involving technology ...

Policy Details	Date	Signature and Name
Policy approved by Senior Management:	February 2023	Claire Pirrie
Policy approved by Senior Governor	February 2023	Caroline Crowther Light
